Ohio SNAP-Ed can show you and your family how to eat healthier and be more active, even on a limited budget. By joining in the Ohio SNAP-Ed programs, you will learn how to choose and prepare foods to improve the quality of your meals. Lessons go hand-in-hand with the Dietary Guidelines for Americans and USDA's MyPlate. Our programs focus on helping you eat smart, live strong, and save money.

Ohio SNAP-Ed offers nutrition education programs in small groups with opportunities for conversation and hands-on learning. Topics include food selection and preparation, nutrition, thrifty shopping practices, food safety, and physical activity. You will learn how small changes can make big differences!

Addressing nutrition is part of our Community Health

Improvement Plan (CHIP) Priority 1: Chronic Disease, with root causes including lack of knowledge, lack of physical activity, and poor food choices.

Our Goal: People of Greene County are preventing and managing chronic disease.

As of 2013, the percentage of obese adults in Greene County at 31% is the same as the state but is higher than the national Healthy People 2020 target of 30.5%.

A critical barrier to healthy lifestyles across Greene County is food

insecurity. The U.S. Department of Agriculture (USDA) defines food insecurity as a lack of consistent access to enough food for an active, healthy life. According to an article from the Journal of Nutrition, most adults living in food insecure households report being unable to afford balanced meals. Studies show that food insecurities can also lead to adverse health effects for both adults and children, including chronic illness, along with developmental and mental health problems.
