

THE P.L.A.Y. PROJECT

(Play & Language for Autistic Youngsters)

Four Oaks has a team of professionals who have been trained by Dr. Richard Solomon, M.D., the creator of The P.L.A.Y. Project. Dr. Solomon is a colleague of Dr. Stanley Greenspan, world renowned developmental pediatrician who developed the D.I.R. (Developmental, Individualized, and Relationship-based) Model - Floortime.

The P.L.A.Y. Project is designed for young children on the autism spectrum. It is based upon the National Academy of Sciences recommendation to begin early (18months – 5 years) with an intensive amount of intervention that is engaging and has a strategic direction.

P.L.A.Y. Project interventions are also used successfully with children who have not been diagnosed on the Autism Spectrum but who have sensory integration or behavior concerns or difficulty relating with others.

With use of video recordings, families are able to be coached by the home consultant about ways to more successfully engage their child so their play becomes meaningful.

Four Oaks team members are available to discuss the appropriateness of working with your child. Call 562-7002 or 562-7000 and ask Mary Ann to schedule a phone consultation.
